### Professional Duplication

The PowerTower series of professional copiers, manufactured by Verity Systems, offer easy to use, standalone, duplication of CDs and DVDs at a cost effective price. PowerTower duplicators are ideal for the small to medium scale production of CDs and DVDs and are perfect for office based, disc publishing environments.

### Easy To Use

With the exception of the 1 to 1 model, which automatically starts to copy when a master is inserted in the CD/DVD-ROM reader, all command operations for PowerTower copiers are entered via the easy to follow control panel.

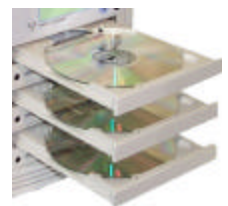

Simply load the drives with blank discs, insert your master into the CD/DVD-ROM drive at the top of your tower and press enter. Your PowerTower duplicator will not only automatically detect the type of CD or DVD master (CD ROM, CD-XA etc.) without any user intervention, but will also provide "frame accurate" Data and Audio including UPC, ISRC and audio indexes. In addition, the compare master and compare copy feature, allow both CDs/DVDs and images to be verified for complete data integrity assurance.

### Fast & Efficient

Also available with a choice of optional internal hard disk providing ample storage for CD or DVD master images. DVD PowerTowers with hard drives can also be fitted with a USB connector. With this new option, users are able to transfer images directly to the duplicators hard drive from their PC.

User Friendly LCD Control Panel
