VersaAUTOPRINTER

Teac P55 thermal printer shown

Flashjet inkjet printer shown

VersaAutoPrinter provides a very affordable automated print only system. The robust Center-Pick autoloading mechanism has provided hundreds of our customers with ease of use and trouble-free operation. The VersaAutoPrinter components are based on industrial design technology that will provide years of trouble-free operation.

The VersaAutoPrinter offers flexibility with your choice of printing technology. The Teac P55 thermal transfer printer offers "off-set/silk screen" quality color printing. For those looking for single color thermal printing, the affordable PowerPro III is available that prints 2000 labels with a single ribbon. The Flashjet inkjet printer provides high quality color output at an attractive price. The recent advances in inkjet printable surfaces offers users a water resistant solution without a large capital investment.

The VersaPrint software offers simplicity in use but with the added option for advanced users. Users simply select their print file, specify a quantity, and select the Start button. In addition, VersaPrint can support label serialization, merge fields, and many other advanced methods for printing your discs. Users can queue multiple print jobs for unattended operation. In the case of large production jobs, VersaPrint supports multiple VersaAutoPrinters controlled by one PC.

The VersaAutoPrinter comes standard with the VersaPrint. CD Painter label design, and Calibrate applications. Your only decision is the choice of printer!

Specifications

- Printers : Flashjet 4800, CopyPro PowerPro III thermal, and Teac P55 thermal
- VersaPrint and CDPainter Design Labeling software
- Power Source : 1155V/230V switchable 550-60Hz
